Dr. Willis Haviland Carrier's "Rational Psychrometric Formulae" presented December 3, 1911 became, and still is, the cornerstone of all fundamental calculations in the air conditioning industry. Understanding Carrier's formulae allows engineers to precisely control both the temperature and humidity of the indoor air that surrounds us daily. The formulae, and the graceful lines they trace on the psychrometric chart, have been translated into most of the world's languages, printed in thousands of textbooks and engineers' handbooks.
