

# DIFFUSION COEFFICIENTS IN LIQUIDS AT INFINITE DILUTION

This table lists diffusion coefficients  $D_{AB}$  at infinite dilution for some binary liquid mixtures. Although values are given to two decimal places, measurements in the literature are often in poor agreement. Therefore most values in the table cannot be relied upon to better than 10%.

Solvents are listed in alphabetical order, as are the solutes within each solvent group.

| Solute                 | Solvent       | $t/^\circ\text{C}$ | $D_{AB}$<br>$10^{-5} \text{ cm}^2 \text{ s}^{-1}$ | Solute             | Solvent            | $t/^\circ\text{C}$ | $D_{AB}$<br>$10^{-5} \text{ cm}^2 \text{ s}^{-1}$ |
|------------------------|---------------|--------------------|---|--------------------|--------------------|--------------------|---|
| Acetic acid            | Acetone       | 25                 | 3.31  | Acetone            | Tetrachloromethane | 25                 | 1.75  |
| Benzoic acid           | Acetone       | 25                 | 2.62  | Benzene            | Tetrachloromethane | 25                 | 1.42  |
| Formic acid            | Acetone       | 25                 | 3.77  | Cyclohexane        | Tetrachloromethane | 25                 | 1.30  |
| Nitrobenzene           | Acetone       | 20                 | 2.94  | Ethanol            | Tetrachloromethane | 25                 | 1.90  |
| Tetrachloromethane     | Acetone       | 25                 | 3.29  | Iodine             | Tetrachloromethane | 30                 | 1.63  |
| Trichloromethane       | Acetone       | 25                 | 3.64  | Trichloromethane   | Tetrachloromethane | 25                 | 1.66  |
| Water                  | Acetone       | 25                 | 4.56  | Acetic acid        | Toluene            | 25                 | 2.26  |
| Acetic acid            | Benzene       | 25                 | 2.09  | Benzene            | Toluene            | 25                 | 2.54  |
| Aniline                | Benzene       | 25                 | 1.96  | Benzoic acid       | Toluene            | 25                 | 1.49  |
| Benzoic acid           | Benzene       | 25                 | 1.38  | Cyclohexane        | Toluene            | 25                 | 2.42  |
| Bromobenzene           | Benzene       | 8                  | 1.45  | Formic acid        | Toluene            | 25                 | 2.65  |
| 2-Butanone             | Benzene       | 30                 | 2.09  | Water              | Toluene            | 25                 | 6.19  |
| Chloroethylene         | Benzene       | 8                  | 1.77  | Acetone            | Trichloromethane   | 25                 | 2.55  |
| Cyclohexane            | Benzene       | 25                 | 2.25  | Benzene            | Trichloromethane   | 25                 | 2.89  |
| Ethanol                | Benzene       | 25                 | 3.02  | 2-Butanone         | Trichloromethane   | 25                 | 2.13  |
| Formic acid            | Benzene       | 25                 | 2.28  | Butyl acetate      | Trichloromethane   | 25                 | 1.71  |
| Heptane                | Benzene       | 25                 | 1.78  | Diethyl ether      | Trichloromethane   | 25                 | 2.15  |
| Methanol               | Benzene       | 25                 | 3.80  | Ethanol            | Trichloromethane   | 15                 | 2.20  |
| Toluene                | Benzene       | 25                 | 1.85  | Ethyl acetate      | Trichloromethane   | 25                 | 2.02  |
| 1,2,4-Trichlorobenzene | Benzene       | 8                  | 1.34  | Acetic acid        | Water              | 25                 | 1.29  |
| Trichloromethane       | Benzene       | 25                 | 2.26  | Acetone            | Water              | 25                 | 1.28  |
